Koch, A. and Steinegger, H.
AN ACCELERATED METHOD FOR TESTING THE
SULFATE RESISTANCE OF CEMENTS. Foreign
Literature Study no. 306. [1960] 10p. (21 figs.
omitted) 6 refs.
Order from SLA ml\$1.80, ph\$1.80 61-10205

Trans. of Zement-Kalk-Gips (West Germany) 1960,
v. 13, no. 7, p. 317-324.

Small, 1- by 1- by 6-cm prisms of standard 1:1:2
mortar are suspended in a 10% $\text{Na}_2\text{SO}_4 \cdot 10\text{H}_2\text{O}$ solution
and their changes recorded during storage by means
of suitable chemical and physical methods, and by vis-
ual observation. This method records not only large
differences in the behavior of cements in the relatively
short time of 3 months at the most, but permits the
observation of finer, gradual changes.
